

Provincial Library, Edmonton THE CROSSFIELD CHRONICLE.

VOL. XXII No. 12.

CROSSFIELD, ALBERTA, THURSDAY, MARCH 21st, 1920.

PRICE \$2.00 A YEAR.

15-30 McCormick Deering Tractors

15-30 tractors are going good—more interest in power farming is being shown than in any previous year. Our special spring proposition will last only three weeks longer—the cheapest tractor on the market today, power considered—and a full line of power machinery to go with it.

The power take off on the McCormick-Deering is built in part—no extras to buy. When you attach your binder next fall, you simply hitch it on, without purchasing expensive attachments. This feature is exclusive.

A McCormick Deering Cream Separator will Pay the Bill

A Weekly cream cheque takes the worry out of monthly grocery bills—let us demonstrate the new easy running McCormick-Deering—it's a winner.

LARGE PICKLING CROCKS from \$600 UP

A few large crocks for pickling meat—get one of these and prepare your own hams and bacon. Prices from \$6.00 up.

BUCKEYE BROODERS

Buckeye Brooders mother baby chicks well. See our Samples.

GROCERIES - All Kinds of Course.

Meeting of Municipal District of Rosebud

Local and General

The first meeting of the council of the Municipal District of Rosebud No. 280 was held in the Municipal office in Crossfield on March 13th at 2 p.m.

The only change for last year was occasioned by the retirement of Mr. F. Davis and the election of Mr. H. T. Davis in Division No. 1.

A. S. Gough was elected Reeve and Geo. Ainscough Deputy Reeve.

The auditor and secretary, treasurer were re-appointed.

The Atlas Lumber Company's tender for lumber was accepted.

The weed problem was again discussed at length and an aggressive campaign favored to this year.

A resolution was passed asking \$2000 from the Government Capitol Grant for roads.

Accounts were passed and ordered paid.

Next meeting in Carstairs on the 12th day of April at 1 o'clock.

ANNUAL MEETING AT THE EAST COMMUNITY HALL

The annual meeting of the East Crossfield Community Hall Club was held last Friday evening. The financial statement for the year was presented and showed a profit of \$600. Much credit is given to the directors for the splendid showing they made under their term of office.

The directors were:—B. Mabley, C. Fox, G. Jones and F. Ruddy. The newly elected directors are: C. Weber, J. O'Neil, J. Scholtefield, and F. Ruddy re-elected.

The dance during the evening was well attended and the music by the Gazelle five piece orchestra could not have been more appreciated.

VILLAGE COUNCIL MEETS

At a meeting of the village Council held on Monday evening in the office of the secretary-treasurer, the new Councillor Wm. Laut, took the oath of office and will fill the unexpired term of R. Whitfield, who recently resigned.

The Council for 1929 is as follows:

Mayor—J. M. Williams,
Councillors—C. Assmusen,
Wm. Laut.

An old time dance will be held in the U. F. A. Hall on Friday, March 22nd, under the auspices of the Crossfield Women's Institute.

A Play entitled "Grandpa Pays A Visit" will be presented at the U. F. A. Hall, Crossfield on Wednesday, April 3rd, under the auspices of the Crossfield and district United church.

The Wongust Guild of the church of Accension will hold their regular meeting at the home of Mrs. R. Whitfield on Thursday, April 4th. Will all members please attend as prompt as possible at 3:30 p.m.

Police Magistrate Mr. Ivor Lewis went to Carstairs Monday to hear a case of vagrancy against two young men with no fixed address. They were fined \$5.00 and cost or 30 days in jail. Unable to pay the fine they were escorted to Calgary by constable Jarman of the A. P. P.

The regular meeting of the C. G. T. I. was held at the home of Mrs. McLean's on Friday, March 15. Plans for the ten which is being held on Saturday, 23rd, were discussed, each girl being assigned some special duty. A report of the district conference, was given by Ida Calkoun; after which the girls had a lively sing song for 20 minutes.

The regular meeting of the C. G. T. I. was held at the home of Mrs. McLean's on Friday, March 15. Plans for the ten which is being held on Saturday, 23rd, were discussed, each girl being assigned some special duty. A report of the district conference, was given by Ida Calkoun; after which the girls had a lively sing song for 20 minutes.

Mrs. R. Nichol was a visitor in Calgary this week.

Mr. and Mrs. Harkness moved to Calgary last Saturday.

Mrs. A. H. Miller was a visitor to Calgary Saturday.

Rev. Clay, of Olds, was a visitor in town Monday.

Mr. Stillwell was a visitor to Drutheller over the weekend.

We notice Mr. O. E. Jones is sporting a new Chrysler auto.

Mr. O. E. Jones was a business visitor in town Monday.

Miss I. Dawson is visiting Mrs. Conrad at Calgary.

Mrs. M. English has been confined to the hospital the past week.

Mrs. R. B. Moser left last week for a visit to her home in Washington.

Mr. Henry Whitfield, of Sherwood, visited at home of his parents over Sunday.

Messrs. Donald & Clarke have secured the agency for the DeLaval cream separators.

A concert and smoker will be held in the U. F. A. Hall on Tuesday, March 26th.

Mr. Wallock has been suffering from an attack of Pleurisy the past week.

R. W. McFarlane, of Bassano, visited old friends in Crossfield last week-end.

Mrs. M. Reid is teaching at Sunshine school during Miss Waldron's illness.

Mr. E. C. Hegy, Chevrolet dealer at Airdrie, was a business in Crossfield Saturday.

Mr. Fitzpatrick is the proud owner of a new Ford Coach. Mr. Leslie Farr, Ford agent Airdrie making the sale.

Mr. W. Laut reports the sale of five McCormick-Deering tractors in this district during the past week.

Mr. T. Amery, of Walla Walla, Washington arrived here this week to attend the Amery & Son sale on Friday, at their home place.

Mr. Stafford, manager for the Calgary Power Company, for Airdrie and Crossfield, conducted business in town Monday.

The Home cafe have had their premises decorated and painted inside which gives it a much improved appearance.

A large crowd attended the sale of Mr. Harkness on Friday last and he reports having received good prices for everything.

Mr. McRory, secretary-treasurer of the Municipality of Rosebud No. 280, left for Calgary Wednesday to attend a meeting of the Hail Insurance board.

Miss Waldron, teacher of the Sunshine school was taken to the hospital in Armstrong's ambulance last Sunday afternoon. Earl Conrade made the trip.

J. M. Williams, local agent for the Rumley tractors, took delivery of two new engines this week which has on display at his blacksmith headquarters.

Among those who conducted business in Calgary this week were, Mr. Miller, Mr. Halliday, Mr. A. Cruickshank, T. Tredaway, Donald McKay and D. McFadyen.

Rev. Adam Cooper entertained a number of the ladies of the parish Tuesday afternoon. A jolly time being spent. The Rev. has added an addition to the home, which will give ample room.

Mr. and Mrs. James Matheral and family, of Foremost, have taken up their residence on the Harkness place, which Mr. Matheral recently purchased. We extend a hearty welcome to Mr. and Mrs. Matheral and their family of ten children: nine girls and one boy.

"The Store that Gives You Service"

Largest Single Item In The Dominion's National Wealth Is That Of Agriculture

The aggregate national wealth of Canada for the year 1926 was \$386,691,482,000, says a report issued by the Dominion Bureau of Statistics. This figure is exclusive of undeveloped natural resources. Similar estimates placed the total wealth, for 1925, at \$28,673,174,000, and for 1921, at \$22,195,000,000, "though these figures are not exactly comparable in view of certain improvements and additions made in the method of estimation," the report points out. The figures, however, can be taken to indicate an increase of about \$500,000,000 for the twelve months under review over the previous like period and approaching an advance of \$3,500,000,000 in the five years 1921-26, the report continues.

The largest single item in the Dominion's national wealth for 1926 was that for agriculture, which reached a total of \$7,081,375,000; the tangible value of the forests, was \$1,866,613,000.

A breakdown of the provincial distribution of wealth, Ontario ranked first, with estimated aggregate wealth of \$9,130,189,000, or 34.2 per cent of the total, and Quebec second, with estimated wealth of \$6,656,108,000. The western provinces came first in per capita wealth, however; British Columbia held first rank with a per capita wealth of \$3,844; Alberta second, with \$3,698; Saskatchewan, third, with \$3,559; and Manitoba fourth, with \$2,957. These figures may be compared with \$2,902 and \$2,598, the per capita wealth of Ontario and Quebec, respectively, and \$2,842, the per capita wealth for the whole Dominion.

By provinces, the estimated wealth was:

Prince Edward Island	\$145,745,000
Nova Scotia	\$835,748,000
New Brunswick	\$729,592,000
Quebec	\$6,656,108,000
Ontario	\$9,130,189,000
Manitoba	\$1,866,613,000
Saskatchewan	\$2,920,739,000
Alberta	\$2,192,067,000
British Columbia	\$6,656,108,000
Yukon	\$12,478,000

Rush For Homesteads

Hundreds Of Homesteads Taken Up In Three Prairie Provinces This Year

From the point of view of new homesteads taken up, the year 1929 has got off to a good start January saw 761 homesteads filed upon, as compared with 457 for the same month last year—an increase, roughly, of two-thirds in favor of the present year. Alberta led the list with 386, as compared with 261 for January, 1928; Saskatchewan followed with 309 as against 184; Manitoba came next with 42 as against 61, and British Columbia last with 24 as against 11.

Object Had Vanished

The class of boys sent to bring them to school for drawing lesson, and just as the lesson was about to begin, a small boy was found standing tearfully at his teacher's desk. "We swallowed my object," he explained.

"What was it?" asked the teacher anxiously.

"A banana," replied the would-be artist.

Products of Canada have an annual value of about \$475,000,000, which approximately \$450,000,000 is distributed for labour, equipment and supplies.

Teacher: "Can any of you tell me an old saying that is now out of date?"

Moses: "Yes, sir: 'Honesty is the best policy.'—Humoristick Listy, Prague."

W. N. U. 1777

Range Investigations

To Determine Cause For Depiction Of Pasture Crops

Range lands pasture on from year to year, usually suffer by a depilation of certain of the valuable plants. A survey of many ranges in Southern Saskatchewan and Alberta, by officials of the Department of Agriculture, at Ottawa, revealed an acute shortage of pasture crops. Many of the ranchers were forced to reduce their stock. The shortage of feed was felt most during winter months and more than 90 per cent of the stock men found it necessary to cultivate some of their land for the growing of forage crops to supplement the native forage. Realizing that something should be done to place the ranching industry on a more permanent and secure basis, the government and the experimental farms have undertaken a programme of work that gives promise of very useful results. An experimental station, fairly representative of the large range area, has been established near the town of Manystones, in Southeastern Alberta. In his report for 1927, published by the Department of Agriculture, Ottawa, Dr. G. P. MacRostie, the Dominion Agrostologist, announced that it is intended to put into practice different grazing methods including that known as deferred and rotation grazing. The grazing practices regarded as most desirable are those that combine maximum utilization with the maintenance of a vigorous vegetative cover of the climax type. The work is only commencing, but very hopeful results are expected from the range projects that are being undertaken.

Fertilizing the Strawberry Bed

Fertilizers Should Be Applied In Fall For Best Results

While fertilizing the strawberry bed in the spring may increase the size of the fruit it does not increase the number of fruit buds in the plants. Investigations carried on by M. B. Davis and H. Hill, of the horticultural division of the experimental farms leads to the conclusion that to increase the fruit buds, fertilizing of the patch requires to be done in the fall of the year. An account of the work published in Bulletin No. 110, of the Department of Agriculture, at Ottawa, shows that the highest yields of fruit were secured when the fertilizer was applied on or about September 5th, of the first year, and of August 15th, of the first year, and of October 1st, of the second year. These dates, it was learned, are quite close to the beginning of fruit bud differentiation as determined by microscopic studies carried on with the young plants.

In Need Of Publicity

New York Paper Has Queer Idea About Vancouver

Vancouver, while voting some \$80,000 this year for publicity purposes, might spend a few dollars of it New York to let New York know there is such a place. A New York paper, in alluding to Percy Williams' feat, says: "The young Canadian is a sensation, and well he might be, as he stepped from the backwoods of Northwest Canada into fame with a dual victory at the 1928 Olympic games." Evidently Vancouver has still a lot to learn about putting herself on the map.—Victoria Colonist.

Opinion Has Changed

The change that has taken place in the mental attitude of the people of Canada toward its vast northwestern areas is simply amazing. At the present time it is admitted by everyone that this territory is no longer a barren wilderness, but a region packed with immeasurable potential wealth, which only awaits enterprise and capital for its development.

U.S. Destroyers To Visit B.C. The United States Government proposes to send six destroyers to visit British Columbia ports during the summer of 1929. Three of these vessels will be at Victoria, and three at Vancouver from July 11 to July 15. Announcement to this effect was made by Hon. J. L. Ralston, minister of national defence.

Now that a motorcycle has ridden along a tight rope it would seem that tight ropes are no longer safe for pedestrians.

Birds have the most remarkable memories of all wild life.

Indian Wedding

The ancient marriage rites of the Stoney People were exemplified when Chief Bear Paw and his minor chiefs united Miss Sylvia Hanishen-Stein of Hilversum, Holland, to Mr. Louis Lantius, of Vancouver. Immediately after the picturesque Indian ceremony which took place on the Bow River at Banff, the couple were again married according to the rites of their own church. Bear Paw is seen placing the eagle feathers, emblem of faithfulness, on the groom's head and bracelet on the wrist of the bride.

Prefer Rural Life

Ontario Man Says Farmer Is His Own Boss

In a letter written to the Farmer's Advocate, "Digit," of Perth County, Ontario, a dissident farmer asserted that those who live on the farm do so because they cannot bear themselves away and are willing to lose money on the farm rather than draw a hundred a week in the city. He says: "I know of several offices in the city where I am welcome to go on the pay roll at any time. I have tasted some of the joys of city life and at a good salary. I came back to the farm for two reasons: First, I could earn more money and have more left when the year was up; and second, there is not the worry and incessant demand of attention to business on the farm. As to the \$100 a week, I met a couple of men who received that amount. I met a hundred who were content and sumptuous farmers, and had gone to the city, and only three or four were getting over \$30 per week; they could have done as well had they stayed on the farm. Foolishly, we forget what it costs to live in the city."

WORLD HAPPENINGS BRIEFLY TOLD

A survey of Fort Churchill will be undertaken immediately by the provincial government for the purpose of laying out a model townsite at Manitoba's seaport.

Charles Angers, former member of parliament, is dead at Quebec, at the age of 71 years. He represented Charlevoix County, at Ottawa, in 1896. He was a Liberal.

Russia's assessment for 1929 will be two and a half million dollars greater than the amount upon which 1928 taxes were struck, it was estimated by R. J. Westgate, city assessor.

Soviet Russia on March 12, celebrated the 12th anniversary of the breaking out of the revolution which resulted in the abdication of the Czar. All shops, business houses and government institutions were closed.

League of Nations officials announced that an agreement had been practically reached on the main points of the protocol for adherence of the United States to the world court of justice.

More than half a billion pounds of dangerous explosives were handled by agents of the United States and Canada in 1928 without injury to any person, and with a property loss of only \$77, the American Railway association announced.

The Polish newspaper *Rzecznik* says it has learned Pope Pius will begin a tour early in 1930, visiting Trieste, Zagreb, Budapest, Cracow, Warsaw, Vienna, Munich, Brussels, Dublin, Paris, Madrid and Lisbon.

Bankruptcy proceedings have been instituted against Princess Victoria, sister of the former Kaiser. The Princess, who is living in seclusion at the palace in Bonn, Germany, declined to make a statement. The first meeting of her creditors was called for April 4.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, flowers, from grass and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Until now there has been no remedy, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

There's a Reason

Tea, it is rumored, can be improved somewhat by following the Siberian custom and adding just a dash of rum. Once when entertaining in Shanghai, a friend of mine gave tea to embellish to a mistress, but seemed the ordinary variety to his wife.

"I just can't understand it," the good lady remarked about half an hour later. "At home John won't touch tea, and here he's having his fifth cup."

Early Heat in Antarctic

Wilkins Party Halted By Melting Ice At Expedition Base

The Antarctic was almost too warm for airplane exploration during the time the Wilkins expedition was at its base at Deception Island early this winter. Sir Hubert Wilkins, leader of the party, said after his arrival from South America.

The earliest summer season in 14 years melted ice at the expedition base and deprived Wilkins of the use of snow-equipped planes, the explorer said.

Wilkins said he made no attempt to reach the south pole, approaching only within 650 miles of it, devoting his time to preliminary survey for weather observation stations in the Antarctic.

Electric Power in Alberta

Transmission Lines Spreading Over Province at a Rapid Rate

The rapid rate at which electric transmission lines have been spread over the province of Alberta, especially during 1928, is indicated in a recently issued government report. A network of high tension lines now radiates east and west, north and south over the central and southern part of the province. There is a continuous line from Edmonton in the north to Magrath south of Lethbridge, in the south, with the exception of the gap of less than thirty miles between Millet and Ponoka still to be closed.

One power company, with headquarters in Calgary, is operating 332 miles of 66,000-volt lines and 839 miles of 13,200-volt lines. Of this mileage approximately 50 miles of 66,000-volt lines, and 474 miles of 13,200 volt lines were built during 1928, and the company's territory in the north now extends as far east as Wainwright and Hardisty.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Instead follow off with death and result in quick cure of an infected razor. Quite safe comes from using PUTNAM'S CORN EXTRACTOR. If afflicted continue to shave with same tool-lump use "PUTNAM'S" it's safe to shave and quick to relieve the pain as they drop right off. No pain, no soreness. Get quick relief from sore corns comes from using PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Tax On Bachelors

Cuba Has Some Advanced Ideas On Legislation

Cuba is not the only country that imposes a tax upon its bachelors, but it is doubtful whether any other nation has shown the enterprise of establishing a governmental matrimonial bureau where spinsters must file their photographs. That, indeed, seems progress. Cuba is not satisfied with collecting every year its ten dollars from all bachelors who persist in eluding the wife of women. II is moved by nobler and far-reaching ideals. It would bring togethers those lonely souls, male and female, who perhaps through an inferiority complex feel unable to take the necessary steps which might lead to courtship and the altar. Springfield Union.

A DANGEROUS MONTH FOR THE BABY

Mothers Always Dread the Blistering March Days

No month of the year is so dangerous to the welfare of little ones as is March, because of quieting weather. One day fine, the next cold and blustery. One day dry, the next wet and disagreeable. In times of precalculus the little ones will take colds and these colds often lead to more serious troubles. Mothers, when the first symptoms appear, should rest the baby, run him, run him, not "Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent the more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe, for they bring a ray of light in the house. The tablets are a gentle thorough laxative that sweetens the stomach and regulates the bowel thus driving out constipation and aiding the liver, the body of the many childhood ailments which are the direct result of a clogged condition of the bowels or a stomach.

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brooklyn, Ont.

By living on board private yachts moored on the River Thames, near Westminster, a number of Londoners escape paying rent, rates and house duty in return for a mooring fee of three guineas a year.

Nervous and Run Down

The Least Noise Would Bother Her

Mr. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise which it would bother me so.

"A friend advised me to take

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again.

Five 50¢ boxes are sent to druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co. Ltd., Toronto, Ont.

Fugitives in Scotland have to get through about three times as many books in the school year as London school children.

The total acreage under pasture in Canada in 1928 was 9,528,043 acres.

SUNDAY SCHOOL LESSON

MARCH 24

STEWARDSHIP AND MISSIONS

Golden Text: "It is required in stewardship that a man be found faithful—Corinthians 4:2.

Lesson: Genesis 12:1-3; Deuteronomy 8:17, 18; Jonah 3:1-10; Malachi 3:7-12; Matthew 25:18-20; Acts 6:8-10; 1 Cor. 16:12-20; Romans 1:14-16; Corinthians 10:32; 2 Corinthians 8:1-10; 9:1-10.

Devotional Reading: Psalm 9:1-8.

Explanations and Comments

Stewardship in regard to missions, Acts 6:1-6. The apostles met Jesus at the Mount of Olives and there they asked Him if at that time He would restore the Kingdom to Israel. Their question shows how very anxious the apostles were that the apostles to rid themselves of the common Messianic expectation of the Jews, that Christ would rule over a Jewish nation independent of the Gentiles and dominate politically and religiously, over the other nations of the earth. "I needed the Pentecostal outpouring of the Holy Spirit to teach the apostles that Christ's Kingdom is not of this world."

"It is not for you to know the times or seasons which the Father has appointed for His Son to come." Was the answer of Jesus. "It implies that He will restore the Kingdom to Israel; not, however, to 'Israel' after the manner of the world imagined but to the 'Israel of God,' i.e. to Christian believers of every nation, by making Christianity the dominant religion."

"O God, I pray Thee for the childlike spirit that can enjoy—all vexing things apart."

The Lord makes Pheu in heaven and death doth show. Nor fret myself with things I do not know."—Babcock.

And then Jesus promised power through the coming of the Holy Spirit, and gave the great commandment that they were to be His witnesses both in Jerusalem and in all Judea and Samaria, and unto the uttermost parts of the earth. Some one has called it the first missionary commandment, mission, state missions, home missions, and foreign missions. The Acts records the story of how the apostles carried out this commandment.

"This uttermost part of the earth is represented by Rome, the capital of the Empire, the place where, as treasured said, "All men must from every quarter converge to come to it."

"This message always bursts me when I think of the vast tracks of earth that have never heard the name of Christ."—G. Campbell Morgan.

Change Bread To Cake

Here's the Magic Recipe

Cut slices of day-old white bread $\frac{1}{4}$ inch thick. Trim off crusts. Cut each slice into strips $\frac{1}{4}$ inch wide by 2 inches long.

Spread these strips on all sides with Eagle Brand Sweetened Condensed Milk, covering bread well.

Roll strips in dry shredded coconut. Place in a greased pan and brown very delicately on all sides under low gas flame, or toast on a fork over coals.

Delicious little coconut cakes result—made from bread. Taste just like Angel Food cake.

Try them! This dozens of other magic recipes are found in the Eagle Brand Cook Book, "New Magic in the Kitchen." Write for your free copy to The Borden Co., Dept. BW, 140 St. Paul St. W., Montreal, mentioning this paper.

Hard and soft corn both yield Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Western Progress

The thriving city of Regina established a notable record in 1928, in attracting new industries. During the last year 12 important industrial concerns located in Regina. They are said to have expended about \$5,000,000 in sites, buildings and equipment, and they will employ well over 2,000 men. Housing accommodation was built last year for 1,000 families, and building has not yet caught up to the demand.

A cast off railroad locomotive with its wheels removed, beats a Norwich, Connecticut, passenger station. It performs efficiently, supplying heat to the train shed, station and cars in the yard as required.

Not only can you astonish your friends with the French you learn in 10 Easy Lessons; You can astonish a Frenchman.

Sugar Beets a Paying Crop

Sugar beets proved the best-paying crop in the Taber Barnwell irrigation district last year, returning an average of \$69.50 per acre. Alfalfa came second, with \$25.85 per acre, and wheat third, with \$23.27. The average production per acre in the project was worth \$28.97.

Fugitives in Scotland have to get through about three times as many books in the school year as London school children.

The total acreage under pasture in Canada in 1928 was 9,528,043 acres.

Take Daylight From Air

Reproduction of Light Said To Be Next Wonder

A radio antenna draws radio waves out of the air. Radio transmits essentially with sound. Absorption and reproduction of light, by a method strikingly similar to radio is likely to be next. R. T. Gee, London, Ont., inventor, president of the R. T. Gee Company, Limited, manufacturer of electric light bulbs, is the discoverer. The process, he states, is to be soon available for general use. When it is introduced, it is stated, it will revolutionize illumination, which is today chiefly created by electricity. For, in addition to drawing out energy out of the air and reproducing it, Mr. Gee's method provides for the storage of such energy until it is needed. This means it is explained, that the aerials at work in the daytime will not only absorb but also store sunlight for reproduction at night.

Bub It For Lame Back—Brisk rubbing with Dr. Thomas' Electric Oil will cure lame back. The skin is immediately affected and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain goes away and there are ample grounds for saying that it is an excellent article.

Tested Rocket Sled

"rocket sled" was tried out at the Schlesheim aviation grounds by Max Waller, inventor of several rocket vehicles. The sled weighs 240 pounds and can be stopped in 10 seconds. Two rocketeers, Waller, using only two rockets, made fine speed on level ground. Spectators tried to visualize the speed that could be made down a snowy slope under the impetus of the rockets, but gave up the attempt before reaching definite conclusions.

Keep Your Health TO-NIGHT TRY

Soap 35¢ Ointment 25¢. Soothing Salve 50¢. Sample each. Address Canadas Dept.: J. T. Wait Company, Limited, Montreal. Cuticura Salve is Soothing and Cooling.

ALBERTA PLANS GRAVELLING OF THREE HIGHWAYS

Edmonton, Alta.—The province of Alberta plans to spend a total of at least \$10,000,000 on improving roads within the next three years, so Hon. O. L. McPherson, minister of public works, told a delegation from the Alberta Motor Association which interviewed the government recently.

Of this huge sum, during the year 1929, said the minister, the government will spend the sum of \$4,547,633 out of capital and income accounts. This figure, however, includes interest and sinking fund charges on previous capital expenditures.

The expenditure for 1929 will cover the complete grading of four main highways from Central Alberta west to the Saskatchewan border. Of these, three main highways, of which they are gravelled road leading east from Calgary through Bassano, Medicine Hat, and on to Walsh, on the Saskatchewan border, will complete a trans-provincial highway clear across the province.

Thus, this main gravelled highway will extend from the Saskatchewan border through Medicine Hat, Bassano and Calgary, linking up with the gravelled highway to Banff.

Britain Plans Second Imperial Air Line

Will Link Capetown With London Says Air Minister

London, England.—Arrangements have been concluded for a second great imperial air trunk line, the two being approximately the same distance and being them far the longest routes in the world.

Sir Samuel Hoare, air minister, announced in the House that arrangements have been concluded for a service between London and Capetown. A service between England and India, also approximately 6,000 miles, has been operating for some time, a provisional time table having been issued for this some weeks ago.

Negotiations between the various African governments, particularly the Union of South Africa, for inception of a weekly air service between London and Capetown, have been brought to a successful conclusion, the air minister announced.

Heavy Snow In Colorado

Two-Day Storm Isolated Small Towns Near Denver

Denver, Colo.—Small towns and villages in the Rocky Mountain region were marooned by snow that covered highways to a depth of three feet in places, following a two-day storm.

The storm area extended northward to the Canadian border, spreading a white blanket over Montana, Colorado and Wyoming.

A group of high school boys rescued Frank Nelson, 74, from his cabin near Mount Almagre, fifteen miles from the famous Cripple Creek mining district of Colorado, where he had been marooned without food.

Wins McKee Trophy

Award For Meritorious Service Given To Western Air Ace

Ottawa—Captain C. H. "Punch" Dickens, commercial pilot of Edmonton, Alta., has received the McKee trophy award for 1923, for meritorious service in the advancement of aviation in Canada. During the twelve months he spent a total of 1,035 hours in the air, a remarkable achievement when consideration is taken of the fact that Dickens performed most of his duty in the northern sections of the Dominion.

Announcement of the award was made by Colonel J. L. Ralston, minister of national defence.

Nobille's Resignation Accepted

London, England.—The Exchange Telegraph Company said it had been officially announced at Rome that General Umberto Nobille, commander of the ill-fated Italia expedition, had resigned his rank an dolfice. The resignation was accepted.

Was Hero Of Gallipoli

London, England.—General Sir Charles Newland, who at an advanced age, served in the Gallipoli and Sicilian defences and was slightly wounded and mentioned in despatches, is dead at the age of 64 years. He retired in 1924.

W. N. U. 1777

Wants Canada To Develop Helium Gas

Operation Of British Dirigible Would necessitate Obtaining Gas Here

London, England.—Development of helium gas for use in airships in Canada is a possible development of the building of the giant dirigibles for trans-oceanic transport by the British air ministry, Sir Samuel Hoare, secretary, intimated in the House of Commons. He said it was hoped to approach the Canadian government later to see whether it would be possible to produce helium in Canada as the gas is produced and used extensively in the United States.

The two airships, he hoped, would be ready to take the air by spring or early summer.

If the home tests are successful it is proposed to make a flight to Egypt and India, and then to Montreal.

Toronto.—Large quantities of helium gas can be produced from the gas wells of the Bow River Valley, of Alberta, to the south of Medicine Hat. The production of helium in commercial quantities was first accomplished in Canada during the war as a result of researches made by Prof. J. C. McLennan, of the University of Toronto.

Helium is non-inflammable and though less buoyant than hydrogen, is much safer.

Radiogram Received From the Antarctic

Welsh Society Of Saskatoon Gets Message From Scientists With Byrd Expedition

Saskatoon.—A radiogram from the Antarctic, played by mail by the New York Times, has been received by Thomas Phillips, Saskatoon, from Frank Davies, in which the latter wishes the Saskatoon Welsh Society a joyous reunion for 1929.

Mr. Davies, at one time an instructor on the University staff here and now a scientist with Commander Richard E. Byrd, in his expedition to the South Pole, sent the message on February 28 from "Little America," Antarctica, and it was received in New York on March 2, too late for the local celebration, which took place March 1. The document will nevertheless form a valuable item in the archives of the Welsh Society in Saskatoon.

Telephone Service Increased

Hundred Line Extension Has Been Completed At The Pas

The Pas, Man.—It was announced by H. Coddington, commercial superintendent of the Manitoba Telephone system, that arrangements for another hundred line extension on the switchboard in The Pas exchange are complete.

"When we took the plant over last July, we had 237 subscribers," said Mr. Coddington. "Today we have 365, and it looks as if we will go over 400 mark within the next two months."

We intend to extend the long distance facilities north to Flin Flon during the present season and in other political topics in the interest of the British public, according to Sir Arthur Balfour, chairman of the British Industry and Trade Commission, which is conferring with the steel men.

"We intend to extend the long distance facilities north to Flin Flon during the present season and in other political topics in the interest of the British public, according to Sir Arthur Balfour, chairman of the British Industry and Trade Commission, which is conferring with the steel men.

"We feel, in England," he said, "that unless our two countries can work in agreement, the cause of disarmament is lost. We will lose the respect of continental powers and another war is on the way."

The Disarmament Question

Britain and U.S. Must Agree In Matter Says Balfour

Buffalo.—The question of Anglo-American relations overshadowed all other political topics in the interest of the British public, according to Sir Arthur Balfour, chairman of the British Industry and Trade Commission, which is conferring with the steel men.

"We feel, in England," he said, "that unless our two countries can work in agreement, the cause of disarmament is lost. We will lose the respect of continental powers and another war is on the way."

London, England.—The biggest fire that London has experienced in recent years caused heavy damage on the south shore of the Thames, a district occupied by paper and tin factories. Three hours after the first alarm, flames were shooting 100 feet into the air, a whole series of the factories being ablaze.

A large part of London was illuminated by the blaze. Scores of fire engines and hundreds of firemen were trying to prevent further spread of the conflagration. They managed to avert danger from neighboring workmen's homes, although the families fled.

One of the losses in the fire was 400 tons of newspaper paper.

Famine In Uganda

London, England.—A dispatch from Kampala, Uganda, to the London News says that thousands of persons dying of famine in Belgian Uganda. Motorists saw hundreds dying on the roadside attempting to cross the border into British Uganda, the dispatch said.

Scientist Dodges Bullets

Berlin.—Prof. Arthur Einstein and Mrs. Einstein left Berlin to avoid publicity on the famous scientist's birthday. He was 50 years old on March 14. They went to an unnamed country place for a short visit.

Estimates For British Air Force Criticized

Kellogg Pact Has Not Changed Policy, Says Labor Member

London, England.—Development of the British Government in debate upon the 1929 estimates for the air force. He said the government's estimates bore no trace of any change in policy since Britain signed the Kellogg anti-war treaty.

Kenworthy criticized the "enormous cost" of the air station at Singapore and also the utilization thereof of young airmen and "expensively trained cadets."

"I could have understood it two or three years ago, before the signature of Great Britain was affixed to the Kellogg anti-war pact," he said.

A total of \$2,500,000, a fifth of which is to be spent this year, he said, is to be devoted to the Singapore station.

If the station is merely for defense of a new dockyard, that is an extraordinarily large sum," said Sir Samuel Hoare.

Sir Samuel said the secretary for air refused that the expense was justified by the general expenditure at the Singapore base, and that Singapore would be capable of handling the serial side of any operations of the naval base.

"Even if there were no base at Singapore, the air base would be necessary," Sir Samuel said, "it is the cardinal point of our communications."

HOUSE PASSES BILL FOR C.P.R. BRANCH LINES

Ottawa.—The Canadian Pacific Railway bill for branch line extensions completed its passage in the House of Commons, when it was given third reading. The bill emerges intact, with the exception that the proposed Sutherland-to-Melfort line in Saskatchewan was eliminated in the committee committee. The bill now goes to the senate.

The measures authorizing the Canadian National branch line developments still stand for third reading on the order paper in the commons. The bills have been held up on account of the budget debate, but will likely soon be accepted and also passed on to the senate.

The C.P.R. bill, being a private one, came up during the hour in the house set aside for private members' bills. It passed with little or no discussion.

The house also quickly gave third reading to the bill which will incorporate Barclays Bank (Canada) without amendment.

The Disarmament Question

Britain and U.S. Must Agree In Matter Says Balfour

Buffalo.—The question of Anglo-American relations overshadowed all other political topics in the interest of the British public, according to Sir Arthur Balfour, chairman of the British Industry and Trade Commission, which is conferring with the steel men.

"We feel, in England," he said, "that unless our two countries can work in agreement, the cause of disarmament is lost. We will lose the respect of continental powers and another war is on the way."

Left Large Estate

Toronto—William Kellaher, ex-cobbler of Toronto, who died recently at the age of 83 years, left an estate valued at approximately \$200,000. Mr. Kellaher, who arrived in Toronto penniless more than 40 years ago, willed \$150,000 to local orphanages.

SHOWS RECORD SURPLUS

Hon. James A. Robb, minister of finance, who introduced the budget in the House of Commons, on March 1, in which he trimmed down taxes, reduced debt and revealed a record surplus of \$69,782,000.

Expect To Complete Railway In April

Line To Churchill Being Steadily Pushed Onward

Winnipeg.—Within sight of the sea, steel laying workers are pushing steadily onward to Fort Churchill, terminus of the Hudson Bay Railway, and early in April, unless the unseasonal occurs, will have completed the 400-mile line.

Telegraph communication with Churchill was established for the first time on March 12, and steel is now within 12 miles of the port, said A. D. Dixon, regional chief engineer of the Canadian National Railways here. Construction material for work at the port already is en route north.

Many Applications For Assisted Passage

Approval Given Large Percentage Of Prospective Settlers

London, England.—In the thirteen months ending January 31, 1928, 6,082 families and 28,468 individuals had applied for assisted passage to Canada.

Hon. C. M. Amery, secretary of state for the Dominions, told the House of Commons. Of these, 2,772 families, and 18,714 individuals had been approved, and 2,140 families, and 15,331 individuals had been rejected.

These figures did not include the special scheme under which the party of British miners were to be assisted passage to Canada as harvesters.

Pilot Has Freak Accident

British Aviator Had Propeller Shattered In Encounter With Hawk

Chico, Calif.—Victim of a freak airplane accident, Flying Cadet R. G. Hamilton, 21, of the flying corps, was forced down in a ploughed field near Chico, six miles north of here, with the propeller of his plane shattered, the result of an aerial encounter with a hawk.

Cadet Hamilton, attached to the British airplane carrier, H.M.S. Hermes, now at San Diego, was flying from that city to Vancouver, B.C., when the freak accident occurred.

BRITAIN HAS NEW SCHEME TO HELP SETTLERS

Ottawa.—A new assisted passage scheme to provide Canadian farmers with British workers has been announced by the Department of Immigration.

Young men in the British Isles who have not been able to find the present £10 steamship fare, are to be assisted and after examination by Canadian immigration authorities will be let into this passage money by the British government. The movement will start within a month, it is expected, and several thousand men will probably be brought out this year.

The proposal announced will embrace a limited number of unemployed miners, physically fit, but not necessarily of the skilled farmer class, who come under the present assisted passage scheme.

A survey of the various provinces is at present being conducted by the department and the number of men to be assisted will depend upon the demand for agricultural workers.

The new scheme is explained to be quite different from the miner-hassisted scheme just now. The movement demonstrates a desire to settle permanently in this country, and no provision is made to provide return fares at the end of the harvest. None of the expense is to be borne by the Canadian Government.

While applicants need not have farm experience, they will be carefully chosen with regard to physical fitness and willingness to accommodate themselves to conditions.

The new program is to supplement the various assisted passage schemes already in effect. The most important of these is the £2 steamship rate for agricultural families, with free passage for children.

Auto Driver Killed Trying For Record

Machine Out Of Control Crashed Into Sand Dunes

Ocean Speedway, Daytona Beach, Fla.—Lee Bible, 42-year-old Daytona Beach garage mechanic, rode to a spectacular death in the 36-cylinder racing car with which he was vainly attempting to break the world's speed record of 231 miles an hour, made by Major H. O. D. Seagrave, of England. Seagrave, at speed of more than three miles a minute, the machine got beyond control and careered into the sand dunes, striking and killing also Charles Traub, a news cameraman. Bible left a wife and two children.

The accident, one of the most tragic in the history of beach racing here, occurred just after Bible crossed the measured mile course at a speed of 202 miles an hour, and was witnessed by a crowd of approximately 20,000 spectators who lined the sand dunes for miles.

To Fight "Red" Menace

Manitoba Command Canadian Legion Asks Action Against Communists

Winnipeg.—Eradication of communism from Canada and the prosecution of those responsible for its spread, was demanded at the fourth annual convention of the Manitoba command, Canadian Legion, British Empire Service League.

The convention also urged that the Communists be prohibited from holding meetings in public schools.

Communists, the delegates declared, were attempting to instill their doctrines into the minds of children and the newly-arrived immigrant. Communist ideals were being circulated in literature and songs "grossly blasphemous, seditious and contrary to the teachings of Christianity."

They would "demoralize youths and would lead to ultimate bloodshed revolution and the breaking down of all religious and civil authority."

Pilot Has Freak Accident

British Aviator Had Propeller Shattered In Encounter With Hawk

Chico, Calif.—Victim of a freak airplane accident, Flying Cadet R. G. Hamilton, 21, of the flying corps, was forced down in a ploughed field near Chico, six miles north of here, with the propeller of his plane shattered, the result of an aerial encounter with a hawk.

Cadet Hamilton, attached to the British airplane carrier, H.M.S. Hermes, now at San Diego, was flying from that city to Vancouver, B.C., when the freak accident occurred.

Secretary To Trade Minister Honored

H. O. Campney Leaving Government Service To Practice Law In Vancouver

Ottawa.—A complimentary dinner was tendered in the restaurant of the Parliament Buildings to H. O. Campney, who for a number of years has been a member of cabinet. Hon. James Malcolm, minister of trade and commerce. Mr. Campney is leaving the government service to practice law in Vancouver. Members of the parliamentary press gallery and the department of trade and commerce attended. E. W. Grange presided.

Want Police Force Similar To Mounties

Idea Suggested To President Hoover To Stop Smuggling

Washington.—A federal constabulary, similar to the famous Royal Canadian Mounted Police, has been suggested to President Hoover as a means of ending liquor smuggling across the Canadian and Mexican borders.

The constabulary would deal not only with rum running, but also with immigration smuggling, and the ordinary run of merchandise smuggling operations now under the eyes of the customs service.

Wants Treaty Signed

U.S. Senator Urges Regulation Of Sockeye Salmon Catch On Pacific

Washington.—The treaty to authorize Canada and the United States to regulate the catch of sockeye salmon on the Pacific coast was brought to the notice of President Hoover and Secretary of State Kellogg again by Senator Wesley Jones, of Seattle. Senator Jones hopes to get the treaty signed before Secretary Kellogg leaves office. He also hopes to get the treaty on the calendar of the special session of the senate beginning April 15 next.

Russian Miners Killed

Moscow.—Twenty-seven miners were killed when a crowded cage fell in a shaft near Gorlovka, in the Donets coal basin.

NEW ASSOCIATION OF CATTLE MEN FOR CANADA

Brandon, Man.—Co-operation of the several Stock Breeders' Associations throughout the Dominion in the formation of a "Canadian Beef Cattle Men's Association" will be sought by the Canadian Aberdeen Angus Association.

A resolution proposing the organization of a Canadian Beef Cattle Men's Association was adopted at the annual meeting of the Aberdeen Angus members here. The purpose of the association would be to support and do promotional work in connection with the beef grading system that has been established by the Dominion government. The resolution was sponsored by Hon. J. D. McGregor, Lieutenant-governor of Manitoba.

Under the resolution, the Dominion Stock Breeders' Association, the Canadian Horned Breeder's Association, the Saskatchewan and Alberta Stock Growers' Associations will be asked to co-operate with the Aberdeen Angus Association in the formation of the new association.

Lieutenant-Governor McGregor and James Bowman, Guelph, Ont., were elected yesterday with F. H. Reed, LaCrombe, Alta., president, and W. J. F. Warren, Belbeck, Sask., vice-president.

Rifle Meet Date Set

Will Be Held During Week Of August Twelfth

Ottawa.—The D.R.A., the annual prize meet of the Dominion of Canada Rifle Association, will be held this year during the week of August 12. The dates for this historic event, which attracts the foremost marksmen of all the provinces, have been fixed at the Rite Ranges just outside the capital, following the annual meeting of the association here.

Brigadier-General J. Duff Stuart, of Vancouver, is the association's new president. Brigadier-General J. G. Ross, of Montreal, whom he succeeds, was created a life governor of the body.

Secretary To Trade Minister Honored

H. O. Campney Leaving Government Service To Practice Law In Vancouver

Ottawa.—A complimentary dinner was tendered in the restaurant of the Parliament Buildings to H. O. Campney, who for a number of years has been a member of cabinet. Hon. James Malcolm, minister of trade and commerce. Mr. Campney is leaving the government service to practice law in Vancouver. Members of the parliamentary press gallery and the department of trade and commerce attended. E. W. Grange presided.

Parent Education

Teaching Grown-Ups How To Become Successful Parents

One is so accustomed to hearing about the education of children that it may come almost as a shock to learn that adult "childing" has taken a new branch of study, known as "Parent Education."

Popular lectures form the "classroom" to which daddies and mothers come as pupils. And they have "homework" too, the most interesting kind of homework, for it consists of trying out on their own offspring, the lessons they learned at "school." And the sole and only purpose of that school is to teach them how to become successful parents.

"And why not?" demanded an official of the Winnipeg Health League, when asked about it. "In this age of specialization, when a professional man has to study six or seven years before beginning to practise, why shouldn't he receive specific training available for those who take on the most important duties in society—that of parenthood?"

"We want to teach people simple, sound, common-sense things about children—nothing faddish you understand—or complicated. Just the good-and-better facts that parents should know if Canadians of the next generation are to be healthy, mentally, mentally and physically as it is possible to make them."

Prominent Canadians from time to time have expressed themselves very strongly upon this theme. A symposium of their writings shows that the trend of opinion amongst thinking people is emphatically in support of the idea.

Judge H. S. Mont, of the Juvenile Court, Toronto, says: "Parents are very much in need of assistance in parent education. I think they should start before marriage."

Judge Emily Murphy: "Educated parents if you can, it should be attempted by all means."

The Most Reverend Archbishop Neil McNeil, Toronto: "A knowledge of the duties of parents and the way of treating children should begin at the time of marriage."

Dr. Margaret Patterson, Judge of Women's Court, Toronto: "There is no question regarding parent education. It should start with the grandparents when possible, but certainly with the parents as children."

Dr. John L. Lightfoot, former chief inspector of schools, Toronto, believes that parent education should start in high school. "The best thing I can suggest," he says, "is the preparation of a book on true child development and the passing of a law that the groom in each marriage should produce the book at his wedding with his name on the title page."

Hon. L. A. David, Quebec: "I believe that parent education should start before marriage."

Hon. William F. Roberts, M.D., former Minister of Health for New Brunswick: "Yes, at twelve years of age."

Judge J. F. McKinley, of the Ottawa Juvenile Court, agrees that parent education should start at twelve.

Professor Peter Sandiford says that every parent should be a child psychologist. "Seventy years ago Spencer pointed out that we trained our parents of children," he says.

Lepers Are Long-Lived

Longevity of leprosy is shown in a report submitted by the territorial board of health to the Governor of Hawaii. Of 322 lepers at Kalawao settlement, fifteen have lived there from forty to forty-nine years; thirty from thirty to thirty-nine years; thirty-six from twenty to twenty-nine years, and 121 from ten to nineteen years. Infrequency of leprosy among members of the white race is also indicated.

Anderson returns to an "Inebriates Home" drunk.

Warder: "You will be punished for being drunk."

Anderson: "How was I to guess that you had to return to an 'Inebriates' Home' sober?"—Karukuran, Oslo.

W. N. U. 1927

Would Abolish Revolver

American Prison Association Believes It Would Lessen Crime

The American Prison Association, which has many Canadian members, has been holding a convention recently in Kansas City and has resolved among other things that "the A.P.A. strongly recommends the abolition of the revolver, except in time of war," and called upon the state legislature to pass laws making it illegal to manufacture, sell, distribute or have in one's possession any firearm with a barrel measuring less than 20 inches.

The resolution is supported by the customary whereases, one of which states that many crimes would not have been committed if the perpetrators had not had a revolver handy, and further that "it has been demonstrated in England and elsewhere that the possession of a revolver by law enforcement officers is not indispensable to maintenance of law and order."

The association apparently takes no notice of the needs of the writers of detective yarns, or still more poignant, those of scenarios projected.

One writer quotes from the scenario of the screen that in the drawers of the drawing-room table in every well-regulated home resides a loaded revolver. It is going to be awkward if they make a law."

As it is in Canada, persons must have a permit to number revolvers among their possessions. The police may carry them at night, but it is not charged that they are careless in the use of them.

Certainly the first whereas of the association is the strongest, but it is an open question whether such prohibition as that suggested would dispossess those intent upon crime of the weapon. It might very nicely be argued that such a step is unnecessary, but that could be accomplished by a strong administration of the permit system. Unless the manufacture was forbidden over the whole continent or several continents the criminal intent upon preying upon society could and would secure his weapon. The association is holding its meeting this year in the autumn in Toronto. General W. S. Hughes, superintendent of Penitentiaries, Ottawa, was one of the speakers at the Kansas City meeting and, judging from the report of the proceedings, made an excellent impression, both personally and by his presentation of the Canadian system.

Many Words Borrowed

Language Spoken In Garage Composed Of Several Tongues

Britain has borrowed many foreign words to make up its oddity common language. Each year a collection of new words are cubed and incorporated in the up-to-date dictionaries, says an article in Pearson's Weekly.

There are a good many languages spoken in the garage, though the foreign words have passed into the English dictionary.

"Garage" itself is French and comes from garer, to make safe. It is related to garret, which meant, in old days, a turret or watch-tower, and with garrison. Garage, in France, is used in connection with shunting on the railways.

The word "motor" is, of course, from the Latin movere, to move, like its brother word motion.

"Engage" implies ingenuity—those words are from the Latin indicating wit, skill and natural ability.

"Chassis" is French from chassis—which also gave birth to windowsash, or shade, as it used to be spelled, and the meaning is a frame.

"Tire" suggests at once, and properly, tire. This word for the outer covering of the wheel comes from the French tiser, to put on or off, to tighten; there are many kinds.

"Jack" is literally a Jack-of-all-trades word. It is a diminutive of John, and is often applied to contrivances replacing a servant, as in boot-jack, or the mechanical device which motorists use for hoisting.

"Gimbals" is another rather mysterious word. It is probably a survival of an old word for curb or bridle, and something to check or bring to a stop.

Gear, in its original use, covered any equipment—a man's clothes, harness for a horse and so on; applied, as it is now, to a series of toothed wheels there is the suggestion of an equipment ready to use.

"Steering" takes us back to the Anglo-Saxon steor, more particularly the rudder of a ship. "Wheel" is also from the language of our forefathers.

Fair One—"And so you hiked from Vancouver to Miami in three months?"

Bored One—"Yes; I should have made it in two months, but I had to walk ten miles."

Needs Many Assistants

Cleaning Boots In Large British Hotel Is Big Job

The superintendent of the boots in a British hotel has a big job on his hands, and has a quite a corps of assistants. In the busy season he may be responsible for the cleaning of two or three thousand pairs a day.

It is no uncommon thing for a wealthy couple to arrive at a fashionable hotel from the Continent, with their boot-cameras crammed with various types of footgear.

All kinds and colors! Grey boots, green boots, brown boots and boots in delicate shades of mauve and beige—those that must be handled with extreme care! Boots and shoes of shark skin, of alligator skin, of snake skin, of lizard skin, and—most expensive of all—boots made from the beautifully mottled hide of the sea leopard.

For the proper treatment of all these triumphs of the shoemaker's art the Master of the Boots is responsible. His is the task of selecting the tinted, chalks, creams and vanishes, and of seeing that they are used correctly.

His experience has made him an artist in his field. His fawns and greys will be of exactly the same shade as the original, his blues and greens of the proper brightness.

His work starts about ten o'clock, and goes on all through the night. Only hard labor is employed, and each one of the many pairs of boots and shoes dealt with during this period passes through five or six pairs of hands before finally being sent upstairs to the floor valets, to be deposited outside the doors of their owners.

In Memory Of General Wolfe

Canadian People To Place Statue In Greenwich Park, London, England

Down in the archives at Ottawa there is a pair of baby shoes marked as once the proud property of a tiny boy who grew to be General Wolfe. A handsome memorial to this man who died for his family with life paid for him in 1759, and died "contented" towers upon the Plains of Abraham, the rendezvous of curious charabanc loads of tourists.

Mostly these tourists are from across the border. It is all in the day's travel with them. But it is a different thing with the Canadians who fall into reveries there as they see with their physical eyes the actual scene, the actual heights, that stand out in the memory no matter how other history lessons have faded. By the same token Canadian visitors to Westminster Abbey seek out Wolfe's memorial there.

Now there is to be added another shrine. By gift of the Canadian people a statue is to be placed in Greenwich Park, London, England. It is said the first selection for Wolfe's victory were much keener in New England than across the sea. To those in Great Britain, Canada was then little known and less regarded, but the American Colonies knew her as a neighbor. Canada today gives back to the Old Country the memory of a famous son, whose name is written in the destiny of half a continent.

A long way through history and on to the end of recorded time have wandered and will wander the pair of baby shoes—Free Press.

First Advertised Ice Cream

The first ice cream advertisement in history appeared in the New York Gazette in 1777. It has been established through the efforts of the New England Association of Ice Cream Manufacturers. Inserted by one Philip Lenzi, styling himself "confectioner from London," the advertisement stated that the new delicacy might be had at his shop "almost every day."

"Jack" is literally a Jack-of-all-trades word. It is a diminutive of John, and is often applied to contrivances replacing a servant, as in boot-jack, or the mechanical device which motorists use for hoisting.

"Gimbals" is another rather mysterious word. It is probably a survival of an old word for curb or bridle, and something to check or bring to a stop.

Gear, in its original use, covered any equipment—a man's clothes, harness for a horse and so on; applied, as it is now, to a series of toothed wheels there is the suggestion of an equipment ready to use.

"Steering" takes us back to the Anglo-Saxon steor, more particularly the rudder of a ship. "Wheel" is also from the language of our forefathers.

Fair One—"And so you hiked from Vancouver to Miami in three months?"

Bored One—"Yes; I should have made it in two months, but I had to walk ten miles."

Sea Floor Is Treasure House

No Bought Many Valuable Things Dropped From Liners

Few landmen realize that there are roads and lanes on the sea, as clearly defined and consistently used as those on land. These "sea-lanes" are steamed over by thousands of ships each year and would disclose some interesting stories.

After the coming of steam and the inauguration of definitely planned routes east and west, the cinders and ashes, broken crockery, old iron unneeded by the liner, all the rubbish that is thrown overboard, must have begun to pile up along the three thousand miles of ocean floor.

On all coal-burning ships ashes are dumped overboard each "watch"—that is, every four hours, but the increasing use of oil fuel is lessening the amount of cinders that go overboard each day.

Cinders and ashes are not the only things that are dumped. There must be there in millions, broken fire-bars by the ton, cleats, bolts, marlinspikes and tools in thousands. To these must be added crockery and glasses—hundreds unbroken and accidentally dumped—and millions of pieces that are the result of everyday breakages, carelessness and the wholesale smashing during a sudden storm.

Perhaps, too, among the glistening china or the twinkling glass that are lying on their bed of cinders, we might be lucky enough to find a ring bracelet or necklace dropped overboard by some luckless passenger. What a treasure house—if only we could explore it!

Broke Record

Frank Dupuis established a world record but lost the race. He established his record when on the first day he covered the initial 41 mile lap of the Eastern International Dog Sled Derby, at Quebec, in 3 hours, 22 minutes, 42 seconds. On the two succeeding days, however, Sepalla, veteran Alaskan musher, succeeded in overtaking the lead and carried off the honors, but Dupuis' time for the first day has never been excelled.

New Settlers Open Big Area

Tremendous Development Taking Place In Western Canada

Indicative of the tremendous development which has taken place in Western Canada, and the large part being played by incoming settlers is that development is being made by incoming settlers to that development. Land settlement officials of the Canadian National Railways in the West estimate that the total area of land broken and prepared for crop development in 1928, in the territory tributary to the National Lines, was 750,000 acres, compared with about 500,000 acres in 1927.

In addition to this, some 200,000 acres was cleared of brush and prepared for breaking during the coming season. The significant feature of this increased farm development is that most of the new land was broken by incoming settlers, recruited and directed to locations by the Colonization Department of the Railway Company.

Millions For Newspaper Space

Louis Wiley, business manager of the New York Times, gives some interesting figures in regard to advertising. Last year \$75,000,000 was spent for radio, \$75,000,000 for outdoor publicity, say \$175,000,000 in magazine publications, \$200,000,000 for direct mail advertising, no less than \$900,000,000 was paid for newspaper space. These are striking figures, and show the trend of the times.

Claims Oldest Parking Law

Kingston claims to have the oldest "vehicle-parking" bylaw in Ontario. In the latter part of 1816 the magistrates who governed the place decreed "that carts and carriages left in the streets shall be arranged along the sides in regular manner, on a penalty of five shillings." No one was allowed to race or run horses on the street, on penalty of five shillings.

Enerprising Vendor—I say, mum, you got such a thing as a match you could give me?

Kind Lady—I haven't one in the place.

"Well, will you buy a few boxes? I sell 'em, mum!"

"So you are going to emigrate to Australia? What do you mean to do there?"

"Take up land."

"Much?"

"A shovelful at a time, to start with, I expect.

Place Of Wheat In The Diet

Per Capita Consumption Appears To Be Increasing The World Over

Wheat now contributes one-fourth of the calories of the American diet. According to the Food Research Institute, of Stanford University, California, it is still the outstanding single staple foodstuff. In most southern European countries, wheat contributes a larger proportion of the total calories of the diet than in the United States; but in countries where rye or rice is the staple cereal, its contribution is smaller. Its nutritional importance in the United States lies primarily in the starch content, not in the content of protein, mineral elements, vitamins, or roughage.

To consume wheat as whole wheat bread instead of white bread would make a significant contribution to the national health, and would not be in the interest of national economy at least so long as the present American diet continues to prevail. Protein, minerals, vitamins, and roughage are adequately available in other foodstuffs and need not be sought in whole wheat bread. Nutritional security in the diet is rather to be sought in the mill supply, and perhaps more than an eighth of the milk supply is secured from mill offals of wheat. Removal of the supply of mill offals, with attendant shifts of feed-crop production scarcely appears advantageous. Only in such countries as India and China, where the diet is little diversified, are nutritional or economic advantages to be secured by consuming whole grain rather than highly milled grains.

What now ranks as one of the cheapest foods, per capita consumption appears to be increasing in the world at large, but not in the United States or in Great Britain, Canada, and Australasia. Under present conditions there is little reason to anticipate increased per capita consumption here, despite appeals on behalf of producers.

Bee-Keeping In The Peace River District

Fair Success Attends Recent Experiments

Bee-keeping is becoming a trial at the Experimental Station, in the Peace River District. With proper care the bees will winter in good condition, but provision has to be made against spring drowning, owing to protracted cold weather and a lack of early nectar yielding plants. Packages of two pounds each were imported in the spring from Alabama. These were hived on drawn foundation and did moderately well. The colonies thus obtained, along with those wintered at the station, were handled during the season for extracted honey.

According to the superintendent in his report for 1927, the yield of bees in 1926 was 140 pounds per colony. The largest single colony, which began the season as a two-pound package shipped in from the south, yielded 226 pounds for the main honey crop at the station.

New Cereal Introductions

During the past three years the Cereal Division of the Dominion Department of Agriculture has introduced for field areas by farmers early-maturing varieties of spring wheat, bearing the names Garnet and Reward, a heavy-yielding variety of field peas known as Mackay, and a strong-strawed two-rowed variety of barley known as Duckbill Ottawa, No. 57.

He: I suppose I'm only a pebble on the beach of your life?

She: That's true, but you might stand a chance if you were a little boulder.

"This is a real Velazquez."

"How do you know?"

"By the bill"—Buen Humor, Madrid.

How Sweet

The chief confectioner of the Canadian Pacific Liner "Empress of Scotland," decorated the buffet of that ship's dining saloon, by making a scale model of the 25,000-ton ship entirely of sugar. Lights shine through the portholes, at the mastheads and the green and red port and starboard lights indicate that she is under steam. Harry Astley, designer and builder constructed the ship in his spare time—spread over five days—and is planning to enter a scale model of the New Canadian Pacific Hotel, in Toronto, the Royal York, at next exhibition in London. He already holds two cups as the prize decorator in sugar at the annual competitions held by the American Hotelmen's Association, in New York. These entitle him to the title American Champion—which is absurd, because Harry, like Canadian Pacific sailors whether they are on the bridge or in the bakery, is from Liverpool.

Too Much ACID

Many people, two hours after eating, suffer indigestion as the canary does. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained the favorite of physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

THE CRIMSON WEST

CHAPTER XVI.—Continued

From up the mountainside came a drumming roar and the rending crash of trees as the fire undermined their roots. Sparks from burning tree-tops crossed the fire-break and started other fires. To combat these, water had to be carried up the steep hillside in pails. Andy was among those delegated to this arduous task. For hours he staggered from stream to hill and back again with a brimming pail in either hand. Scorched by sun and fire, the perspiration streaming down his face and stinging his eyes, the little hero stuck gamely to his task.

"I 'd run on this 're's job as a cook," he grumbled, "not as a blin' wa-ter-spout. Strike me pink, if the water I've carried today was sprinkled in 'ell the dev'dl be out of a job. Oh, well, I'm resigned," as he slipped his pails and trudged to again ascend the hill. "Mathewson said 'Every little bit 'elp'! This time buckets myke exactly four million, two 'undred and six gallons that I've carried this d'y!" At this instant his foot caught in a root to send him sprawling on his face rolling down the mossy hillside, the pails clattering after. He lay where he had fallen, flat on his back, with arms outstretched. "There," he soliloquized, "that was the wisp of straw that broke the elephant's back. To 'ell with the fire. Let the blighter burn."

Wilkinson came wearily down the hill. His face was blackened and blistered, his hat gone, and his shirt a network from holes burned through the cloth by flying sparks. He sprawled on all fours by the stream, drank sparingly, then plunged his face in the cooling waters.

"Eh, Wilkie!" shouted Andy, "ow' you'd you like to 'ave a cold bottle of beer?"

Wilkinson seized a stone threateningly, glared at his tormentor, "Men have been killed for less," he growled huskily.

"I s'pose, Wilkie," grinned Andy, "these Forestry jobs are a snap. Do you think they're to collect \$—salary?"

The district ranger was too tired for speech. His swollen face puckered in a smile and he passed on up the hill, and Andy came stiffly to his feet and resumed his never-ending task.

Connie brought reports that the fire was being held on the north and east. The fire-break on the south held, but spot fires were kept in check only by the almost super-human efforts of the fire-fighters.

Forest fires reach the peak of their intensity while the sun is hottest. With darkness the wind subsides,

You will never use crude methods to get rid of excess acid. You know this better method. And you will never suffer from excess acid when you practice this easy relief. Please do that—for your own sake—now.

Phillips' Milk of Magnesia.

It has remained the favorite of physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

and, especially in the mountains the heavy dew are a never-failing help.

The sun, showing blood-red through the smoke, now sank behind the hills and a blessed coolness filled the air. The fire smoldered along the fire-breaks, but the dredged sparks were not flying. The trembling roar diminished to a steady crackling where fallen trees were being steadily consumed.

The fire-fighters, their shoulders drooping, and wavering from sheer weakness, plodded down the hill for exhausted food and rest.

"You'll have to be at it again at daylight," said Wilkinson grimly. They nodded a tired assent. Wilkinson and Donald patrolled the fire area throughout the night.

The next morning broke suddenly in a dull roar. As the first streaks of light heralded the coming of day, the fire-fighters again took up their posts. Men from the other mill arrived, and another day of battle with the fire demon was begun. An attempt was made to check it on the west front, high up the mountain-side, where the fire had crept through in the night to a small level plateau. At ten o'clock the wind came suddenly, and with it the fire broke through on the south-west corner with a deafening roar and rushed through a stand of dead trees with ever-increasing speed.

Donald shouted a quick cry of warning to the men who were in danger of being cut off by this break. They came on the double quick. Just in time, as a lurid wall of flame shot up the hill over the path they had traversed.

"Are the men all out?" questioned Donald.

"Andy isn't here!" said one of the men excitedly.

Donald seized the speaker's arm. "Was Andy with you?"

The man nodded.

Donald's face set in grim lines.

Whirling quickly, he ran straight toward the line of fire. With a bound Connie was on her horse and after him at swift trot. As he neared the screen of smoke, Pegasus changed his gait to that of a mad runaway, and with the small rider lying prone on his bare back disappeared from view.

Andy's parched lips and bathed his hot face as he lay panting on the ground. He sat up with an effort and looked about him. "Where's Connie?" he asked. But Connie had stolen quietly from the scene.

By mid-afternoon the main body of the fire was apparently under control, but the persistent spot-fires kept the entire crew engaged. A huge cottonwood, standing just within the fire-breaks, was the chief offender. Sparks from its lofty blazing top were floated by the wind to land on the dry ground, starting numerous fires.

"That tree will have to come down or we will be fighting spot fires indefinitely," said Wilkinson.

Silence fell. Everyone of those lumberjacks knew the dagger attached to the falling of a rotten, blazing tree. In sound timber the skilled "faller" can cut the scarf and drive the falling-wedge to lay the tree within six inches of the desired spot. With a hollow tree the task is much more difficult, as in the soft, decayed pumice the wedge may not provide sufficient leverage to swing the enormous weight, and the tree may snap from any angle.

Men working at the butt of a burning tree, too, are exposed to the fall of branches. Even a small branch, starting from the dizzy height of lousy cottonwood or willow, will break a man's limb.

Wilkinson picked up a falling saw.

"Who will go with me?" he called.

Gillis stepped forward with wedge and hammer.

"Notin' doln'," said little Blackie.

"Wilkinson here has a wife and an' Jack has brains enough to be our boss. Me and Hoop-la ain't got neither, we're just a couple rough-necks. Whadda you say, Hoop-la?"

"Ye betcha," came vigorously from Blackie's pal.

Two men were sent with them to assist in clearing a space at the foot of the big snag. A few minutes later the twang of the cross-cut, mingled with Blackie's happy singing, sounded above the crackling of the flames.

Wilkinson pointed to the southern sky, where heavy nimbus clouds were massing. "At last! The blessed rain is coming!" he cried in a voice of thankfulness.

A stronger gust swept through the valley to send a surge of flame from the giant cottonwood's topmost branches. There was a sharp cry of warning as a limb broke off with a splitter-crash and came roaring to the ground, sending up a cloud of dust. A strangled cry of pain, animal-like in its intensity, cut the air. "Blackie's hit," screamed Hoop-la.

Blackie lay on his back, his clothes torn and bound about his head.

With a burst of power, Hoop-la flung the crushing weight aside, and his big hands quickly smoothed the fire in the clothing of his fallen comrade.

Gently he raised the stricken man in his arms and bore him beyond the range of fire.

"Blackie! Oh, Blackie! are you all right?" he questioned fearfully as he looked down at the quiet face that held the grey pallor of death.

"Call the doctor and bring a stretcher," sharply ordered Wilkinson.

(To Be Continued.)

Canada's Chinese Population

Last Registration Gave Total Number As 55,706

According to reports tabled in the House of Commons, three Chinese immigrants were admitted to Canada during the fiscal year 1927-28, two of whom were women. Two students coming to attend Canadian universities were also admitted as non-immigrants. Eleven Chinese were deported during the year.

The registration carried on during 1923-24 showed a Chinese population in Canada of approximately 55,706. Of this number, 48,305 were males, 1,302 females, and 6,099 children under 18 years of age. Of the total British Columbia had 31,116 Chinese residents.

The number of Japanese entering Canada in 1927 was 511, and in 1928, 535. Of the total for two years, 273 were adult males, 557 adult females, and 216 children under 18 years of age.

Dump Valves For Passengers

They have long had dump valves in airplanes for gasoline, but now they have got one for passengers. Floyd Smith demonstrated the device at Mercer airport, tilting the passenger seat until level, and letting a trap-door dummy passenger hurtle down from a height of 1,500 feet. The dummy's parachute opened in one and four-ninths second and the dummy floated safely to earth.

It is estimated that only 5% per cent. of Florida's white population is foreign born.

W. N. U. 1777

Up-To-Date Airport

Municipal Field At Oakland, California, Has Every Modern Convenience

How many people realize that parking space for airplanes is sold in the same way as parking space for automobiles in the downtown areas of big cities? To take Oakland Municipal Airport at Oakland, California, as an example. Over night ground rental costs one dollar per plane. Hangar space less than 1,000 square feet costs two dollars a day or forty dollars a month, while quotations for larger spaces up to an area over 2,000 square feet are charged at four dollars a day or seventy-five dollars a month.

One can get a plane washed just as a car is washed for \$1.25 an hour. Mechanics are available at this airport for two dollars an hour during regular working hours and three dollars an hour during other periods.

If you arrived at this airport by plane and wanted to stay overnight the night, you would pay two dollars a night or fifteen dollars a month. There are at this airport conveniences found at few other airports and that of sleeping quarters is one of them.

Oakland airport which is operated in connection with the seaport of the city, has had a speed boat channel from San Leandro Bay, an arm of San Francisco Bay, dredged direct to hangars. This channel is 150 feet wide, and 16 feet deep, and allows for the landing of seaplanes at the same field that serves land planes.

It is a matter of 11 miles from the seaplane landing to the San Francisco city limits.

A restaurant to accommodate 150 people was recently completed at the field. There is a coffee shop, a dining room with full view of the field and a banquet room housed in this building, in addition to the usual news stand, tobacco shop, soda fountain and souvenir booth, which one is accustomed to find at any railway station.

A restaurant to accommodate 150 people was recently completed at the field. There is a coffee shop, a dining room with full view of the field and a banquet room housed in this building, in addition to the usual news stand, tobacco shop, soda fountain and souvenir booth, which one is accustomed to find at any railway station.

Western Horse Shipments

Twenty-five Thousand Sent To Eastern Canada Last Year

Western horses to the number of 25,000 were shipped from the prairies to Eastern Canada last year. Most of these horses came from Alberta and Saskatchewan, and were disposed of principally in Ontario and Quebec although some were shipped as far as Prince Edward Island. The shipments varied from heavy draught animals to light range stock and about 5 per cent. were unbroken. A carload of these unbroken range horses of Percheron and Belgian breeds, was shipped into Paisley, Ont., recently and sold at public auction, realizing an average price of \$71 for a head.

Traveller (at country railway station): "Do the fast trains ever stop here?"

Porter: "Yes, we had a smash-up here once."

Shirts are being worn by constantly increasing numbers of Chinese.

It's Safe

The nurse tells you to take Aspirin because she knows that it is safe. Doctors have told her so. It has no effect on the heart, so take it to stop a headache or check a cold. For almost instant relief of neuralgia, neuritis, rheumatism; even lumbago, prove it's Bayer—the genuine Aspirin. At druggists, with proven directions for its many uses.

Aspirin is a Trademark Registered in Canada

ASPIRIN

Little Helps For This Week

"Robot" For Nine Years

Expert Chess Player Fooled Patrons Of New York Museum

The secret of perhaps the strangest "robot" ever exhibited in America has been revealed with the death of Peter J. Hill. Thirty years ago in New York city, the proprietors of a dime museum astonished their customers with an "automaton chess player." Thousands, including many internationally known players, tried in vain to defeat the "mechanical man." The robot in reality was Hill, masked and disguised. An expert chess player, he sat in a chair for nine years, shuffling the pieces on board with jerky, mechanical movements, maintaining silence and keeping his secret from those with whom he played.

Whales have the largest brains of all mammals, the largest on record weighing 7,000 grams.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light that strong for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and easily cut and shaped. It is successfully used for sunrooms, verandas, schools, factories, hospitals, sanitarians, hospitals, plant coverings and greenhouses. It keeps out cold and heat, cuts or chills ordinary paper, scatters and is easily cut. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness weighs about 11 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 For Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE
Bask in 100% Sunlight
Send for booklet "WINDOLITE"

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's way of doing it allows the passage of Ultra-Violet rays, as that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has been a valuable long-felt want.

Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely transmits the Ultra-Violet rays, and that it has a most beneficial effect upon the growth and development of plants and chickens and on the well-being of cattle, enabled by the transmission of healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to agriculture, and has greatly improved the health of cattle and is now being used in domestic and household requirements.

Maintain The Quality Of Alberta's Crops

BETTER SEED

means

Better Yields — Better Grades — Better Prices

A special committee appointed by the Minister of Agriculture, with the co-operation of numerous organizations in the province, is urging the use of this spring by farmers throughout the province of

High Quality, Clean, Treated Seed Grain

In order to reduce the heavy annual losses sustained by sowing inferior seed.

Farmers can co-operate by:

1. Using registered seed wherever available.
2. Using at least high quality commercial seed.
3. Having seed tested for germination and purity.
4. Treating seed for smut.
5. Thoroughly cleaning all grain intended for seed.
6. Seeding only varieties of recognized quality and variety suitable to the district.

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

U.F.A. Locals, Board of Trade, the Wheat Pool, Banks, Commercial Grain Firms, the Press, and many other organizations are working in co-operation with a —

BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture, the Dominion Seed Branch; the Canadian Seed Growers' Association, the Alberta Seed Growers' Association, the C.P.R. Agricultural Department, and the University of Alberta.

D. A. McCANNEL,

FARM TRAINING FOR BRITISH BOYS

The first group of fifty British
boys coming to Alberta during the
coming summer will receive the arrangement
between the Provincial Government
and the Overseas Settlement Board
will arrive in Edmonton about March
28th. The boys will be given a
month's course of training at the
Provincial Schools of Agriculture at
Olds and Vermilion before being
placed in employment on farms in the
provinces. A second group will arrive
about May 1st and will be similarly
trained and placed in farm work.

Parties of young British women are
expected to arrive about June 1st and
July 1st. They will be given a
month's instruction which will fit
them to fill positions as domestic
help throughout the province.

Both the boys and the girls coming
forward under this arrangement have
been selected through the office of
Herbert Greenfield, Agent General for
Alberta in London. They are all said
to be of the type most likely to be
readily adaptable to conditions in
Western Canada, many of them al-
ready having had experience in farm
work.

ALBERTA SETS NEW RECORD IN OIL PRODUCTION

The 630,405 barrels of oil produced
by wells in all parts of the
Dominion in 1928, Alberta oil fields
provided 488,268 barrels or 77.4%.
This Alberta production of 488,268
barrels in 1928 compares with 318,741
barrels in 1927, showing an increase of
about 170,000 barrels or more than
50%. Total production for the
Dominion last year was 630,405 barrels
compared with 476,559 barrels in
1927.

NEW SCHOOL INSPECTOR APPOINTED

R. J. Scott, Principal of McKay
Avenue School, Edmonton, has been
appointed Inspector of Schools for the
Oyen Inspectorate succeeding the
late F. L. Ayleworth, whose death
occurred recently. Mr. Scott, who has
occupied his recent position for the
past ten years, has had twenty-one years
teaching experience and is well
qualified for the new duties he will
take up.

SETTLERS INTERESTED IN IRRIGATED LANDS

A market activity in land sales in
the Brooks District is reported by
Don H. Park, Superintendent of the
C.P.R. Demonstration Farm at
Brooks. Mr. Park states that more
new settlers are coming into the
irrigation districts this year than the
total of the movement during the
past five years. The majority of the
new arrivals are coming from the
eastern provinces and from the western
and central states.

ALBERTA MUSKRATS SHIPPED TO ENGLAND

Ten pair of live muskrats were
shipped from Edmonton during the
past week to England. This shipment,
the first of its kind to be made
from Western Canada, will form the
nucleus of breeding stock for a large
English fur raising concern. The
shipment was made by A. C. Mc-
Fadgen, who states that if this trial
proves successful, several thousand
more rats will be shipped through the
next few months. Further evidence of
the rapid growth of this industry
is given by signs for breeding stock
which Mr. McFadgen "has" recently
received from Czechoslovakia.

C.N.R. APPOINTS INDUSTRIAL AGENT

Robert Henderson who for the past
eight years has been connected with
the District Engineer's Branch in
Edmonton has been appointed Indus-
trial Agent for the Alberta lines
of the Canadian National Railway.
The action of the C.N.R. in making
similar appointments in the three
prairie provinces reflects the increasing
interest being taken by eastern
firms in the commercial and industrial
development of the West.

STOCK OF GAME BIRDS TO BE INCREASED

Some 2,000 Chinese ring-necked
pheasants, 600 Mongolian pheasants
and 3,000 pheasant eggs for hatching
will be brought into Alberta this year,
states C. A. Hayden, president of the
Provincial Fish and Game Association.
It is reported that the pheasants
placed in several districts in the
provinces last season have wintered very
well and it is hoped that through the
activities of the association and a
number of local bodies, the supply of
these desirable game birds will be
greatly increased in the next few
years.

GOLD LAKE MAY HAVE FISH HATCHERY

Further experiments will be carried

Burglars Given Jail Sentence

Pleading guilty to the burglary of Mc-
Lear's store at Crossfield and the theft of
an automobile from Crossfield, George
Weston and Frank Cheveril arrested
Thursday evening by provincial Police
when they attempted to pick up their
lost a few miles north of the city after the
stolen car had stalled were sentenced to one
year imprisonment by Magistrate Sanders
Calgary.

For the theft of the automobile they
were each sentenced to one year
imprisonment and for the burglary nine
months. The sentences will run concurrently.

Coming Auction Sales

Ben Storey who resides 2 miles west
of Deleocue is holding an auction sale
of his entire farming equipment on the
Thursday, March 28th. Leslie Farr, Auctioneer.

This is a big sale. Percy Scott
is residing on the place.

Mr. Cria Arasmussen, 3 miles north
and 4 miles west of Crossfield, is
holding an auction sale at his farm
on Wednesday, March 27th. Archie
Boyce is the auctioneer.

H. Oneil who resides seven miles
southeast of Crossfield, is holding an
auction sale of his livestock, machinery
and household goods on Wednesday,
March 27th. Sale at 12 o'clock.
Leslie Parr, Auctioneer.

A Community sale of 75 head of horses,
horses, machinery, furnishing and other
articles is being held at the
Village of Airdrie, on Monday,
March 29th. Sale at 12 o'clock.
Leslie Parr, Auctioneer.

Whist Club Meets at Home of Mrs. Sid. Jones

The Whist Club met at the home Mrs. Sid. Jones on Wednesday evening last.
Members present were — Mrs. J. M. Williams,
Mrs. Hall, Mrs. Overby, Mrs. Clarke,
Mrs. Donald, Mrs. Devine, Mrs. Wilson,
Mrs. Brown, Mrs. Assumption, Miss Stella
Gordon, Mrs. Jarman and Mrs. E. Jones.
Mrs. Jarman won the first prize and
Mrs. Donald the consolation prize.

John Hammett and Richard G. Hill
arrested by Constable Chapman with a
gun which had been sent from a Calgary
firm to a hotelkeeper at Olds in their
possession were each sentenced to three
months imprisonment on a charge of having
stolen property by Magistrate Sanders
Sunday.

Council Meetings

The council of the village of Crossfield will
meet in the Office of the Secretary Treasurer
on the first Monday of each month
commencing with February at the hour
8:30 o'clock p.m.

By Order of the Village Council.
W. McRory, Sec. Treas.
